NOVA SCHOOL OF SCIENCE & TECHNOLOGY

Computer Skills & Technologies & Languages

Java (Advanced), **JavaScript/Typescript** (Advanced), **Git** (Advanced), **SQL** (Intermediate), **Flutter** (Intermediate), **C** (Intermediate), **Python** (Intermediate), **Google Cloud Platform** (Intermediate), **Blender** (Beginner), **R** (Beginner);
Portuguese (Native); English (Advanced).

Professional Experience

Critical Techworks (BMW Group) — **Lisbon, Portugal**
Full-stack Developer – Java / Angular — NOVEMBER 2025 – Present

- Developing and maintaining an automotive logistics application covering parts, suppliers, processes, reporting, and traceability from production to the assembly line.
- Building full-stack solutions with **Java** and **Quarkus** on the backend and **Angular** on the frontend, using technologies such as **PostgreSQL**, **Kafka**, **Docker**, and **Liquibase** in a Scrum environment.
- Applying engineering excellence practices, including unit, integration, system, and end-to-end testing in Java with **JUnit** and **AssertJ**, **Playwright** in Angular, peer reviews, CI/CD, and continuous code quality analysis with tools like **SonarQube**.

3cket — **Lisbon, Portugal**
Full-stack Developer — OCTOBER 2023 – JUNE 2024

- Developed an Android/iOS app and web dashboard using **Flutter**, **React**, and **Java** with **Spring Boot**, enabling around 3,000 Lisbon School of Medicine students to explore resources, campus activities, and purchase event tickets.

OutSystems — **Linda-a-Velha, Portugal**
Software Developer Intern – Summer Internship — AUGUST 2023 – OCTOBER 2023

- Developed and implemented an internal project management tool, integrating **Asana** and **Jira** via **REST APIs** to optimize workflows and backlog visibility.
- Automated sprint planning and introduced an availability submission system, significantly improving resource allocation and efficiency.
- Collaborated closely with stakeholders to gather requirements, created user stories, and ensured accurate role-based system access.
- Achieved "**Associate Reactive Web Developer**" certification, demonstrating proficiency in OutSystems development.

BEST (Board of European Students of Technology) — **Almada, Portugal**
IT Department Member — OCTOBER 2022 – JULY 2023

- Organized technology workshops, facilitating the sharing of different technologies and computing concepts to more than 100 organization members.

Relevant Projects

Master's Thesis - *Vertical Federated Learning in Satellite Constellations for Low Earth Orbit*

- Developed a communication-efficient Vertical Federated Learning framework tailored for Low Earth Orbit satellite constellations, addressing the unique constraints of satellite-based networks in distributed machine learning applications.

University Application Development - Bachelor's Final Project (5-Member Team)

- Collaboratively engineered a comprehensive university application featuring user registration, login, Google Maps-guided orientation, real-time university news, a student schedule system, group chats, and role-specific features for professors, students, and directors.
- Integrated **Google** App Engine, Google APIs, Google Cloud Storage, Datastore, and **Firebase**, utilizing a **Java** backend and **Flutter** (Dart framework) on the frontend for seamless functionality and performance.

Education

NOVA School of Science and Technology — **Lisbon, Portugal**

- Integrated Master of Engineering in Computer Science — SEPTEMBER 2020 – OCTOBER 2025
- Semester abroad at Wrocław University of Science and Technology, as part of the ERASMUS+ program

Escola Secundária Artur Gonçalves — **Torres Novas, Portugal**

- High School Graduate, Science and Technology – GPA: 18/20 — SEPTEMBER 2017– JULY 2020
- Erasmus+ Project in Sicily, Italy
